

Frontend Javascript Developer

WHAT

Tech and Design

WHERE

510.Lab – Amsterdam

At 510.Lab we are on a mission to help organizations unleash their full innovation potential, by enabling them to bridge the gap from working with legacy system to a fully digital organization. Together with our clients we explore their digital transformation potential and implement solutions for their daily operations. The quality our product will be your responsibility, it's all about delivering an impressive experience as a whole. Every detail matters.

As a Frontend Javascript Developer you will work in a dynamic and relaxed environment closely to the development and business team with the ambition to achieve a new digital era. You will be responsible to implement our product designs, making elegant transitions and animations, growing and organizing our core styleguide towards our modular design system.

Personality

- Eager to go beyond the conventional by learning, sharing knowledge and using new technologies;
- Communication is essential for our success and our daily development as human beings;
- Ability to set priorities and multi-task in a fast-paced environment;
- A pro-active, problem-solving attitude;
- Strong organizational skills and decision-making ability;

Responsibilities

- Implement pixel-perfect designs by respecting our Design Principles - one of the most important factors;
- Perform tests (cross-browser, bugs, task flows);
- Collaborate with our UX/UI Designer to assure visual and functional quality;
- Write maintainable and reusable code;

Knowledge & Expertise

- Able to translate design flows from Sketch or Zeplin to code;
- Experience with HTML, Javascript, SASS, SVG and CSS3 transitions;
- Experience with styleguides and design systems;
- Experience with Git;
- Experience building SPA's with component-oriented architecture;
- +4 years professional experience;
- Ability to encourage and enforce proper test practices and methodologies within the development team;

Nice-to-Haves

- Experience with TDD and Agile methodologies;
- Experience with design systems;
- Experience with JS animation libraries (GSAP, anime.js, three.js);
- Experience with Vue.js and Vuetify frameworks;

510.Lab Offers

- A competitive compensation;
- Powerful laptop plus two 27-inch monitors;
- Lunch, coffee, fridge with beers and bites;
- Benefits: Collaborative environment, ability to learn, personal development, team building events, game room;

We want someone that can think and relate the beauty of how the world can look like tomorrow without losing touch with today's context.

Let's bring simplicity back.
